

Health Compass – User Web App Development Report

Date: October 3, 2025

Project: Health Compass – User Web Application

Prepared for: Client Review

Completed Modules

The following modules have been fully implemented, tested, and are operational:

1. **Dashboard** – Centralized hub for user health data and activity tracking.
2. **Journaling** – A platform for users to log and track their daily health-related activities.
3. **Medicine** – Medicine tracking with schedules, dosage, and reminders.
4. **Smart Recommendation** – Personalized health and wellness suggestions tailored to the user.
5. **Health AI** – AI-powered analysis and insights to improve user health outcomes.
6. **AI Recommendations** – AI-driven health recommendations based on the user's profile and activity.
7. **Vaccination Tracking** – Track vaccine schedules, records, and reminders for users.
8. **Supplement** – Manage personal supplement intake and track dosage.
9. **Caregiver Portal** – Manage health and activities for family members or dependents.
10. **Content Hub** – A repository of health-related educational content and resources.
11. **Daily Activity** – Health tracking for steps, exercise, and hydration, all on the web.
12. **Settings** – Allows users to customize app settings, preferences, and notifications.
13. **Auth and Onboard** – Secure user registration, login, and onboarding process for new users.
