Health Compass – User Mobile App Development Report

Date: October 3, 2025
Project: Health Compass – User Mobile Application
Prepared for: Client Review

Completed Modules

The following modules have been fully implemented, tested, and are operational:

1. **Dashboard** – Centralized hub for user activity and health data overview.

2. **Journaling** – Feature for users to log their daily health-related activities and notes.

3. **Medicine** – Medicine tracking with schedules and reminders.

4. **Smart Recommendation** – Personalized health and wellness suggestions based on user data.

5. **Health AI** – AI-powered health analysis and insights based on user data.

6. **AI Recommendations** – AI-driven advice and notifications tailored to individual user health.

7. **Vaccination Tracking** – Vaccination record tracking, scheduling, and reminders.

8. **Supplement** – Personal supplement tracking, including reminders and dosage details.

9. **Caregiver Portal** – Functionality to manage health for family members or dependents.

10. **Content Hub** – Educational health-related content, articles, and resources.

11. **Daily Activity** – Daily health tracking features, including steps, exercise, and hydration.

12. **Settings** – User settings management (notifications, preferences, etc.).

13. **Auth and Onboard** – User registration, login, and onboarding process completed.
