Project Overview

The Health Compass Admin App is designed to streamline the management of health-related services, including **user management, medicine/supplement tracking, telemedicine, vaccination, caregiver coordination, and system governance**. The project has progressed significantly, with most modules completed and operational.

Completed Modules

The following modules have been fully developed and implemented:

1. **Auth Module** – Completed, except for Google Login (Firebase setup pending).

2. **User Management** – Fully developed and operational.

3. **Medicine Management** – Successfully implemented.

4. **Telemedicine Management** – Fully functional.

5. **Vaccination Management** – Completed.

6. **Caregiver Management** – Fully developed.

7. **Feedback Module** – Implemented and operational.

8. **Content Hub** – Completed and integrated.

9. **Settings Module** – Developed and functioning.

10. **Super Admin Dashboard (Super Admin)** – Completed.

11. **Administrator (Super Admin)** – Completed.

12. **Supplement Module** – Implemented.

13. **Ingredients Module** – Implemented.

14. **Tags Module** – Implemented.

15. **System Audit Logs** – Completed.

16. **Feature Flag** – Developed and functional.

The Health Compass Admin Web App supports **two roles**: **Admin** and **Super Admin**.

- All screens and functionalities have been managed and aligned according to backend role-based permissions.
